

Yannick Badoual

software engineer

<http://badoualy.com> · yann.badoual@gmail.com · 23 years old

Programming

Object Oriented: Java, Kotlin, C#, C++

Mobile: Android SDK

Functional: Scala, OCaml

Database: Oracle, MySQL, SQLite, Cassandra

Others: C, Hadoop, ReactiveX, js, PHP

Experience

Mobile developer

Be-Bound - Paris, Jul 14 - Today

Developed multiple Android applications to use without an Internet connection via Be-Bound technology:

- Facebook client using Graph API
 - Mail client
 - Sms client
 - Translation and Currency app
 - Instant messaging (Android client + Spring server) using Telegram API (via **Kotlogram**)
- Lots of UI optimizations to have a smooth UX, custom views, layouts.

Developed several gradle plugins (groovy) and java libraries to factorize code, they are used by all developers in the company. Using gitlab, jira, artifactory, scrum method, redmine.

System/Network administration internship

City Hall - Cergy, May 13 - Jul 13

Setting up Windows 2012 servers with a complex network configuration (using VLANs, Teaming, and a SAN) and an Hyper-V cluster.

Languages

French (native)

English (fluent)

Japanese (daily conversation)

Applications

Kotlogram

Sept 2015

<https://github.com/badoualy/kotlogram>

Easy to use and straightforward Kotlin (and Java) binding of Telegram API.

Tsukiji
